

T-Bar Thermometer

Pictograms

°C, °F, Data Hold, Auto Off, Battery

The **MST-21** T-Bar thermometer offer an alternative solution to semi-solid sampling. It offers a pointed penetration probe and T-bar shaped handle that offers a natural grip for inserting and extracting the probe from samples. It excels at measuring the core temperature of more solid items such as meats and cheeses whilst remaining suitable for liquids. The unit comes equipped with data hold to retain the measured value on the display and auto off after 1 hour of inactivity.

- -50° to 150°C x 0.1°
- Data hold function retains the displayed value
- Pointed tip makes this instrument ideal for liquid or semi-solid sampling
- Data hold function retains the displayed values
- Auto power off after 1 hour of no activity
- Polycarbonate case with membrane keypad
- 12mm LCD display with function indicators
- 125mm x 5mmØ stainless steel probe
- Thermistor sensor is located in the bottom 10mm of the probe
- Supplied with protective probe cap & battery
