➡ Installing the software

1. Run the application VideoCap.exe in the disk (please copy the file to your computer for

    future use)

2. select the video capture source ' USB Endoscope' from the 'Device' menu. This is not needed

    if you only have one source. Make sure the ' Preview' mode Is enabled in the 'Option' menu.

➡ How to take still picture

If this is your very first capture, select "Set Snapshot File Folder' from File menu to configure the

folder where the pictures will be stored. A browser window will open, select a desired folder and

click 'OK'. Now all the taken pictures will be stored in the folder you selected.

Click'Capture'>'Snapshot' to take a photo. The photo will be saved in the folder you selected

automatically.

➡ How to Capture and save video

If this is your very first capture, select'Set Capture File Folder' from File menu to configure the folder where

the video will be stored. A browser window will show, select a desired folder and click 'OK', Now all the video

will be stored in the folder you selected.

Click 'Capture' > 'Start Capture' to start the video capture, to stop the video capture click the 'Capture' > 'Stop

Capture'. The video will be saved in AVI format in the folder you selected.

You can configure the video property (e.g. brightness) from 'Video Capture Filter' in the ' Option' menu.
